Referral Process for Implanted Pumps

- Call or fax the following information:
 - Home Care Plus Intake sheet or demographic sheet
 - Operative Report (catheter model, length)
 - Last telemetry strip
 - Orders
- Home Care Plus will contact you within three hours to let you know the reimbursement situation for providing care in the home

On-going Exchange of Information

- Prior to each visit the patient / caregiver will be contacted to arrange a time and to determine if any adjustments might be needed. (The patient / caregiver is instructed to contact their physician to discuss any potential change)
- Home Care Plus will fax a copy of the nursing notes and the telemetry strip to your office after each patient contact
- Home Care Plus will contact each patient within one week of an adjustment / refill to check on the condition of the patient
- Home Care Plus requests that your office fax a telemetry strip for any refill / adjustment so that our records reflect accurate dates, medication concentrations and rates.
